Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/723,385

Applicant(s)

CARVER ET AL.

Examiner

Joseph G. Ustaris

Art Unit

2617

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 308-318, 341-355, 375-409 and 411-423 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 308-318, 341-355, 375-409, and 411-423 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment dated 04 May 2005 in application 09/723,385. Claims 308-318, 341-355, 375-409, and 411-423 are pending. Claims 345, 347, 375, 376, 379, 380, 383, 386, 387, 392, 403, 405, 406, 408, 409, 411-413, and 418-420 are amended. Claim 423 has been added.

The objection to claims 345, 387, 403, 411 is now withdrawn in view of the amendments.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 308-318, 341-343, 347-355, 375-376, 380, 381, 385-390, 392-409, 411-413, and 423 rejected under 35 U.S.C. 102(e) as being anticipated by Swix et al. (US006718551B1).

Regarding claim 308, Swix et al. (Swix) discloses a "content and service handling method", where it distributes broadcast streams and pay-per-view movies to a number of set-top boxes (STBs) (See Fig. 1; column 4 lines 39-65). The system "maintains an

Art Unit: 2617

inventory of advertising opportunities in content and services” and “binds inventory with advertisements”, where the system is able to insert advertisements into various advertisement slots within menus, broadcast streams, and pay-per-view movies (See Fig. 3, 300; Fig. 4, A1, A2, A4; Fig. 5, Ad 1; column 9 lines 17-44). The advertisements are “bound” according to the customer profile and demographic group, where each advertisement is a targeted advertisement that has information that enables the advertisement to be classified in a demographic group or “additional information pertaining to binding” (See column 6 lines 8-24 and column 11 lines 23-33).

Regarding claim 309, the broadcast streams and pay-per-view movies “bounded” with advertisements are delivered to the STBs (See Fig. 1).

Regarding claim 310, the “inventory” is controlled by a media service provider or “an entity” (See column 3 line 65 – column 4 line 14).

Regarding claim 311, the media service provider discussed in claim 310 is also considered the “service provider”.

Regarding claim 312, the media service provider discussed in claim 310 is also considered a “network affiliate”, where inherently the head end is “affiliated” with various sources that provides the continuous broadcast programs, pay-per-view movies, and advertisements (See column 3 line 65 – column 4 line 14 and column 4 lines 58-65).

Regarding claim 313, the media service provider discussed in claim 310 is also considered a “network provider”, wherein the head end provides continuous broadcast streams and pay-per-view movies that are inherently from various other sources or “networks” as discussed in claim 312.

Regarding claim 314, the media service provider discussed in claim 310 is also considered a “content provider”, wherein the head end provides “content” to its viewers.

Regarding claim 315, the “inventory” is controlled “by a plurality of entities”, wherein the broadcast stream has predetermined advertisement slots filled in with national advertisements by inherently other sources or can be replaced with targeted advertisements by the media service provider operating the head end (See Fig. 5; column 13 lines 10-23).

Regarding claim 316, “different portions of the inventory are controlled by a plurality of entities”, wherein the broadcast stream discussed in claim 315 have predetermined advertisement slots filled in with national advertisements by inherently other sources or the media service provider operating the head end can provide advertisements within menu screens and with pay-per-view movies (See Figs. 3-5).

Regarding claim 317, the media service provider operating the head end can replace national advertisements within a broadcast stream with targeted advertisements or “binding advertisements by an operator on behalf of the plurality of entities” (See Fig. 5; column 12 line 60 – column 13 line 23).

Regarding claim 318, the delivery of pay-per-view movies “is in response to a request for content” (See column 12 lines 47-59).

Regarding claim 341, the advertisements are classified in demographic groups or “have guidance information” (See column 11 lines 23-33).

Regarding claim 342, the classification of the advertisements discussed in claim 341 is also considered “advertisement insertion information”, wherein it is used to select

Art Unit: 2617

and insert the appropriate advertisements for various customer profiles and demographic groups.

Regarding claim 343, the advertisements discussed in claim 341 are classified in demographic groups or "information about an intended audience".

Claim 347 contains the limitations of claim 308 (wherein the head end stores advertisements (See column 7 lines 19-30) and each advertisement is a targeted advertisement that has information that enables the advertisement to be classified in a demographic group or "each of the advertisements including guidance information" (See column 6 lines 8-24 and column 11 lines 23-33)) and is analyzed as previously discussed with respect to that claim. Furthermore, the system binds the advertisements according to the demographic groups of the consumers and advertisements or "based at least in part on the guidance information" (See column 6 lines 8-24).

Claim 348 contains the limitations of claims 309 and 347 (wherein the advertisements and contents are delivered to a STB or "terminal device" (See Fig. 1)) and is analyzed as previously discussed with respect to those claims.

Regarding claim 349, the "terminal device" is a STB (See Fig. 1).

Claim 350 contains the limitations of claims 310 and 347 and is analyzed as previously discussed with respect to those claims.

Regarding claim 351, the media service provider discussed in claims 310 and 350 is also considered a "local network operator", wherein the media service provider operates the head end that is accessed by the network that is local with respect to the STBs (See Fig. 1).

Art Unit: 2617

Claim 352 contains the limitations of claims 312 and 350 and is analyzed as previously discussed with respect to those claims.

Claim 353 contains the limitations of claims 313 and 350 and is analyzed as previously discussed with respect to those claims.

Claim 354 contains the limitations of claims 314 and 350 and is analyzed as previously discussed with respect to those claims.

Claim 355 contains the limitations of claims 315 and 347 and is analyzed as previously discussed with respect to those claims.

Claim 375 contains the limitations of claims 342 and 347 and is analyzed as previously discussed with respect to those claims.

Claim 376 contains the limitations of claims 343 and 347 and is analyzed as previously discussed with respect to those claims.

Claim 380 contains the limitations of claim 308 and is analyzed as previously discussed with respect to that claim. Wherein the system also performs the "method for placement of advertising content or services for presentation". The system "maintains an inventory of opportunities" as discussed in claim 308 during delivery of the broadcast streams, pay-per-view movies, and menus (See Figs. 3-5). The system also "binds advertising to the inventory" by following the instructions from the profile processor or "according to one or more of instructions or software programs... associated with the advertising", where the profile processor creates the instructions according to the customer profile and demographic group of the advertisements (See column 6 lines 8-24, column 7 lines 31-42, and column 11 lines 23-33). Then the system places or

Art Unit: 2617

replaces the advertisements within the menus, broadcast streams, and pay-per-view movies with advertisements or "composing advertising content associated with the advertising with the content or services" (See Figs. 3-5).

Regarding claim 381, the broadcast streams and pay-per-view movies are delivered to one or more users (See Fig. 1).

Regarding claim 385, the file server within the head end inherently "imports" the instructions from the profile processor, wherein the instructions are "associated with advertising copy for binding the advertising to the inventory" (See column 7 lines 19-42 and column 11 lines 23-33).

Regarding claim 386, the instructions provided by the profile processor discussed in claim 385 is also considered "one or more instructions", wherein it is used to select and insert the appropriate advertisements for various customer profiles and demographic groups.

Regarding claim 387, the targeted advertisements discussed in claims 385 and 386 are also considered "advertising copy" and also includes part of the instructions, where each targeted advertisement includes information that enables the advertisement to be classified in a demographic group (See column 6 lines 8-24 and column 11 lines 23-33) which is used to direct or instruct the profile processor to create the full instructions needed to bind the advertisements with the inventory.

Regarding claim 388, the broadcast streams, menus, and pay-per-view moves or "content or services" have advertisements slots or "ancillary data associated with the

Art Unit: 2617

content or services" (See Fig. 3, 300; Fig. 4, A1, A2, A4; Fig. 5, Ad 1; column 9 lines 17-44).

Regarding claim 389, the advertisement slots discussed in claim 388 show the "available advertising times associated with the content or services".

Regarding claim 390, the advertisement slots are delivered within a broadcast stream (See Fig. 5, 500) or "conveyed in-band with its associated content".

Regarding claim 392, the system also "imports and stores" customer profile data that is used to select appropriate advertisements that would appeal to the interest of the viewer or "data associated with the advertising for use to associate advertising content with other content" (See column 6 line 60 – column 7 line 42).

Regarding claim 393, the customer profile data discussed in claim 392 is used to "bind advertising to the inventory" (See column 11 lines 23-33).

Regarding claim 394, the "binding of the advertising to the inventory" is optimized by using the customer profile data that includes "information about the content and services" and the classification of the advertisements under certain demographic groups or "information about available advertising" (See column 11 lines 23-33 and lines 59-67).

Regarding claim 395, the advertising is optimized by placing the advertisements within the advertisement slots or "advertising placement schedules" (See Fig. 3, 300; Fig. 4, A1, A2, A4; Fig. 5, Ad 1; column 9 lines 17-44).

Regarding claim 396, the "inventory" is also a "dynamically appearing inventory", wherein various advertising opportunities appear whenever a view orders a pay-per-

Art Unit: 2617

view movie or various opportunities appear in a broadcast stream (See Figs. 4 and 5; column 11 line 59 – column 12 line 19).

Regarding claim 397, the pay-per-view movies discussed in claim 396 are considered “time-shifted viewing”, wherein the viewers order the movies and it delivered after it has been ordered.

Regarding claim 398, the head end dynamically builds a playlist of targeted advertisements with the ordered movie or “dynamic binding of the advertising to the dynamically appearing inventory before it is consumed” (See Fig. 4; column 12 lines 1-19).

Regarding claim 399, the “dynamic binding includes binding the advertising just in time before the inventory is consumed” (See column 12 lines 47-59).

Regarding claim 400, the national advertisements within the broadcast stream are replaced with targeted advertisements or “replacing advertisements in the content or services” (See Fig. 5; column 12 line 60 – column 13 line 23).

Claim 401 contains the limitations of claims 380 and 400 and is analyzed as previously discussed with respect to those claims.

Regarding claim 402, the head end is controlled by the media service provider (See column 4 lines 1-14) that controls the distribution of pay-per-view movies inherently from other sources or “originators” (See column 11 line 59 – column 12 line 19) and the contents of the broadcast streams are inherently from other sources or “numerous originators” (See Fig. 5; column 13 lines 10-23).

Regarding claim 403, the media service provider is able to control the advertising within pay-per-view movies and menu screen or "includes handling of the advertising content and services (See Figs. 3 and 4).

Regarding claim 404, the media service provider is able to "bind" advertising to "opportunities" within the contents of the broadcast stream and to the pay-per-view movies, which are inherently from other source or "numerous originators" (See Figs. 4 and 5).

Regarding claim 405, the media service provider also "maintains an inventory of opportunities in the content or services from the numerous originators", wherein the contents of the broadcast stream have predetermined advertisement slots filled in with national advertisements by inherently other sources or "originators" or can be replaced with targeted advertisements by the media service provider operating the head end or placing advertisements with the pay-per-view movies that are also inherently from other sources or "originators" (See Fig. 5; column 13 lines 10-23).

Claim 406 contains the limitations of claims 380, 396, 402, and 405 and is analyzed as previously discussed with respect to those claims.

Claim 407 contains the limitations of claims 397 and 406 and is analyzed as previously discussed with respect to those claims.

Claim 408 contains the limitations of claims 385, 386, and 406 (wherein the advertisements with classification information is also considered "self-guiding advertisements" that includes "one or more information or instruction" used for "binding

Art Unit: 2617

the advertisements to the inventory”) and is analyzed as previously discussed with respect to those claims.

Claim 409 contains the limitations of claims 385, 386, and 408 (wherein the “binding the advertising to the content” uses the customer profiles or “user information” to be factored into the “binding decision” (See column 11 lines 23-33)) and is analyzed as previously discussed with respect to those claims.

Claim 411 contains the limitations of claims 403 and 406 and is analyzed as previously discussed with respect to those claims.

Claim 412 contains the limitations of claims 404 and 406 and is analyzed as previously discussed with respect to those claims.

Claim 413 contains the limitations of claims 405 and 406 and is analyzed as previously discussed with respect to those claims.

Claim 423 contains the limitations of claims 380 and is analyzed as previously discussed with respect to that claim. Furthermore, the targeted advertisements disclosed by Swix are also considered “self-guiding advertisements”, where each targeted advertisement includes information that enables the advertisement to be classified in a demographic group (See column 6 lines 8-24 and column 11 lines 23-33) which is used to direct or instruct the profile processor to create the full instructions needed to bind the targeted advertisements with the inventory.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 344 and 377 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swix et al. (US006718551B1) in view of Coleman (US20020026351A1).

Claim 344 contains the limitations of claims 343 and is analyzed as previously discussed with respect to that claim. However, Swix does not disclose that the information about the intended audience includes a mailing list.

Coleman discloses a method and system for delivering targeted commercial messages. Each commercial message contains selection criteria where it defines what groups the commercial is intended for, e.g. people within certain zip codes area or "mailing/address list" (See paragraph 0107). Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify the advertisements disclosed by Swix to include zip codes or "mailing/address list" of intended audience, as taught by Coleman, in order to provide a more efficient means of targeting advertisements.

Claim 377 contains the limitations of claims 344 and 376 and is analyzed as previously discussed with respect to those claims.

Art Unit: 2617

Claims 345, 346, 378, and 379 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swix et al. (US006718551B1) in view of Brown et al. (US006751299B1).

Claim 345 contains the limitations of claims 343 and is analyzed as previously discussed with respect to that claim. However, Swix does not disclose that the information about the intended audience includes a phone list.

Brown et al. (Brown) also discloses a method for targeting advertisements. Brown discloses that the advertisements have profiles that define certain criteria. The advertisement profiles define some characteristics of its targeted audience, e.g. area code of the audience or "phone list" (See column 9 lines 8-45). Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify the advertisements disclosed by Swix to include area codes or "phone list" of intended audience, as taught by Brown, in order to provide a more efficient means of targeting advertisements.

Regarding claim 346, the advertisement profile discussed in claim 345 includes "scheduling information" (See Brown column 9 lines 25-30).

Claim 378 contains the limitations of claims 345 and 376 and is analyzed as previously discussed with respect to those claims.

Claim 379 contains the limitations of claims 346 and 347 and is analyzed as previously discussed with respect to those claims.

Claims 382-384 and 414-422 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swix et al. (US006718551B1) in view of Dedrick (US005724521A).

Claim 382 contains the limitations of claims 380 and is analyzed as previously discussed with respect to that claim. However, Swix does not explicitly disclose that the advertising content is from an advertiser's network.

Dedrick discloses a system method for providing advertisements to end users. Dedrick discloses a metering server that is able to forward advertisements to the users (See Fig. 1). The advertisements are provided by the publisher/advertiser or "importing advertising content from an advertiser's network" (See Fig. 1; column 3 lines 6-28 and column 4 lines 36-48). Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify the system disclosed by Swix to receive or "import" its advertisements from an "advertiser's network", as taught by Dedrick, in order to expand the resources available to the system thereby offering a wider variety of content/advertisements to the viewers.

Regarding claim 383, the file server within the head end inherently "imports" and stores targeted advertisements, where the targeted advertisements includes part of the instructions, where each targeted advertisement includes information that enables the advertisement to be classified in a demographic group (See column 6 lines 8-24, column 7 lines 19-42, and column 11 lines 23-33) which is used to direct or instruct the profile processor to create the full instructions needed to bind the advertisements with the inventory.

Regarding claim 384, the "binding the advertising to the content" uses part of the instructions included with the advertisements as discussed in claim 383 to locate the targeted customer profiles or "user information" to be factored into the "binding decision" (See Swix column 11 lines 23-33).

Claim 414 contains the limitations of claims 380, 402, and 404 and is analyzed as previously discussed with respect to those claims. However, Swix does not disclose generating reports related to the use of the advertising for communication to the originators.

Dedrick further discloses that the client system is able to monitor the consumption of advertisements by the users and provide this data back to the advertisers or "generating reports related to the use of the advertising for communication to the originators" (See Dedrick column 9 lines 28-48). Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify the system disclosed by Swix to generating reports related to the use of the advertising for communication to the originators, as taught by Dedrick, in order to increase the capabilities of the system thereby providing a means for the advertiser to see how effective their advertisements are to the viewers.

Regarding claim 415, the broadcast streams have national advertisements included with various programs (See Swix Fig. 5, 500; column 12 line 60 – column 13 line 23).

Claim 416 contains the limitations of claims 382 and 415 and is analyzed as previously discussed with respect to those claims.

Claim 417 contains the limitations of claims 382 and 414 and is analyzed as previously discussed with respect to those claims.

Claim 418 contains the limitations of claims 383 and 417 and is analyzed as previously discussed with respect to those claims.

Claim 419 contains the limitations of claims 384 and 418 and is analyzed as previously discussed with respect to those claims.

Claim 420 contains the limitations of claims 396 and 414 and is analyzed as previously discussed with respect to those claims.

Claim 421 contains the limitations of claims 397 and 420 and is analyzed as previously discussed with respect to those claims.

Claim 422 contains the limitations of claims 398 and 420 and is analyzed as previously discussed with respect to those claims.

Claim 391 is rejected under 35 U.S.C. 103(a) as being unpatentable over Swix et al. (US006718551B1) in view of Knee et al. (US 20020095676A1).

Claim 391 contains the limitations of claim 388 and is analyzed as previously discussed with respect to those claims. However, Swix does not disclose importing ancillary data conveyed out-of-band from its associated content.

Knee et al. (Knee) discloses a method of delivering advertisement information within an interactive television system. Knee discloses that advertisement information is transmitted using various techniques, e.g. over an out-of-band channel (See paragraph 0023), wherein the advertisements information is considered "ancillary data" that is

Art Unit: 2617

associated with various channels. Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify the system disclosed by Swix to deliver or import ancillary data out-of-band from its associated content, as taught by Knee, in order to provide more bandwidth within the in-band channels thereby increasing the amount of information that can be carried within the in-band channels.

Response to Arguments

4. Applicant's arguments filed 04 May 2005 have been fully considered but they are not persuasive.

Applicant argues with respect to claim 308 that Swix does not disclose advertisements each including additional information pertaining to binding. However, Swix discloses targeted advertisements, where each targeted advertisement includes information that enables the advertisement to be classified in a demographic group or "information pertaining to binding" (See column 6 lines 8-24 and column 11 lines 23-33) which is used to direct or instruct the profile processor to create the full instructions needed to bind the advertisements with the inventory.

Applicant further argues with respect to claim 347 that Swix does not disclose advertisements that includes guidance information. However, as discussed above, Swix discloses targeted advertisements, where each targeted advertisement includes information that enables the advertisement to be classified in a demographic group or "guidance information" (See column 6 lines 8-24 and column 11 lines 23-33) which is

Art Unit: 2617

used to direct or instruct the profile processor to create the full instructions needed to bind the advertisements with the inventory.

Applicant also argues with respect to claim 380 that Swix does not disclose binding advertising to the inventory according to one or more instructions associated with the advertising. However, Swix discloses a profile processor that creates instructions that "binds advertising to the inventory according to one or more of instructions or software programs... associated with the advertising", where the profile processor creates the instructions according to the customer profile and demographic group of the advertisements (See column 6 lines 8-24, column 7 lines 31-42, and column 11 lines 23-33).

Applicant argues with respect to claim 406 that Swix does not disclose mediating handling of content or services from numerous originators and maintaining an inventory of opportunities to present advertising during delivery of the content or serves. However, Swix discloses a system that is able to distribute pay-per-view movies, commercials, and broadcast streams with national non-targeted advertisements (See Fig. 4 and 5), where inherently commercial or advertisements originate from advertisers (as suggested by column 1 lines 20-42) and pay-per-view movies or broadcast streams originate from various sources or "originators". Furthermore, Swix discloses maintaining an inventory of opportunities to present advertising during delivery of the content and services from numerous originators (See Fig. 5, program broadcast 500), where the broadcast consists of national advertisements and programs. The system is able to replace the national advertisements with targeted advertisements that are stored on the

file server. Swix also discloses inserting advertisements in other services, e.g. when ordering pay-per-view movies.

Applicant further argues with respect to claim 414 that Swix does not disclose (1) binding advertising to content and services from at least several of the originators and (2) that Dedrick does not disclose that the information is provided to the “publisher/advertiser 18”, or other originators. With respect to applicant’s arguments to Swix, please see arguments above. Furthermore, Dedrick discloses that the information is also transferred to the advertiser or originators (See Dedrick column 9 lines 43-45).

Applicant is reminded that although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2617

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph G. Ustaris whose telephone number is 571-272-7383. The examiner can normally be reached on M-F 7:30-5PM; Alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher S. Kelley can be reached on 571-272-7331. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
